

Smoke Alarm Learning

Name / chosen name: _____

Smoke alarms can give an early warning of fire. An adult should check and maintain alarms using local guidance and the manufacturer's instructions. Do not cover, disable or remove an alarm.

When an alarm signals a fire, follow the escape plan agreed with an adult. Go to the outside meeting place and stay outside. Never go back inside for belongings. Practise calmly with an adult; this worksheet is not a real emergency drill.

1. Who helps check and maintain smoke alarms?

2. Where should you go after leaving?

3. Why should you stay outside?
