

Solar System Planet Order

Name / chosen name: _____

Our solar system has eight planets. Use this order diagram to complete the questions. The Sun is a star; Pluto is a dwarf planet.

From the Sun →

Schematic only: planet sizes, colors, gaps and positions are not to scale. All eight planets orbit the Sun; they are not usually lined up.

1. Write the eight planets in order from the Sun

2. Which planet lies between Earth and Jupiter?

3. How is the Sun different from a planet?
