

Tallest Paper Tower

Name / chosen name: _____

Challenge: Build the tallest free-standing paper tower that stands for 10 seconds.

Materials: Two sheets of paper, a small strip of tape and a ruler.

My design sketch

My prediction and plan

1. First test result

2. One change I will make

Test: Try a wider base or different folds. Measure height and record stand time.

Safety: Build on a stable table; no standing on chairs.
