

What Is the US Constitution

Name / chosen name: _____

The US Constitution sets out the structure and powers of the federal government. It was signed in 1787 and took effect through state ratification. It has been changed by amendments.

The federal government has legislative, executive and judicial branches. Their powers are divided, with checks on one another. State governments also have important powers. This is the US system, not the Australian system.

Preamble Ideas

Name / chosen name: _____

The Preamble is the introduction to the US Constitution. It describes purposes such as justice, domestic peace, common defense, general welfare and liberty. It is not a list of every detailed government power.

Discuss these ideas in your own words. How could a group make fair rules and resolve disagreements? A classroom example is a learning model, not a legal interpretation of constitutional rights.

What Is an Amendment

Name / chosen name: _____

An amendment is a change or addition to the Constitution. Article V sets out ways to propose and ratify amendments. It is harder than passing an ordinary federal law.

The Bill of Rights is the first ten amendments, ratified in 1791. Amendments have also changed rules about slavery, voting and other important matters. Research a specific amendment in the National Archives rather than guessing its meaning.
